Portfolio: https://kriyesha2004.github.io/My-Portfolio/

Professional Summary

Motivated and detail-oriented final-year Software Engineering student with hands-on enterprise-level experience in full-stack and frontend web development. Proven track record of delivering clean, scalable solutions across two internships, utilizing modern frameworks like React, Angular, NestJS, and .NET Core. Adept at leading development teams, implementing Agile methodologies, and adapting quickly to new technology stacks. Seeking a Full-Stack or Frontend Junior Developer / Intern role to contribute to high-impact software solutions.

Technical Skills

- **Frontend Technologies:** Angular, React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Framer Motion, Responsive Web Design
- **Backend & Databases:** .NET Core API, C#, NestJS, PHP, SQL Server (SSMS), MySQL
- **Development Tools & Testing:** Swagger, Git, GitHub, RESTful APIs
- **Methodologies & Concepts:** Software Development Life Cycle (SDLC), Agile/Scrum, Object-Oriented Programming (OOP), Test-Driven Development (TDD)
- **Soft Skills:** Team Leadership, Agile Task Coordination, Problem Solving, Adaptability, Communication

---

Experience

Courtaulds Clothing Lanka (Pvt) Ltd | *Full-Stack Developer Intern*

March 2026 – Present (3 Months)

- Contribute to enterprise web applications by developing responsive frontend interfaces using **Angular** and **TypeScript**.
- Design and implement robust backend RESTful APIs using **.NET Core** and **C#**.

- Manage and query relational databases using **SQL Server Management Studio (SSMS)**.

- Utilize **Swagger** for comprehensive API documentation and backend endpoint testing to ensure seamless frontend integration.

- Collaborate closely with the IT department team to understand requirements and deliver production-ready code.

QT LabX | *Frontend Developer Intern*

October 2025 – January 2026

- Developed and optimized responsive web application features using **React.js**, **Vite**, and **TypeScript**.

- Built a library of reusable, high-performance frontend components, ensuring consistency across application views.

- Collaborated daily with senior developers in an **Agile/Scrum** environment, actively participating in sprint planning and code reviews.

- Gained deep practical experience in Git version control workflows, clean coding practices, and deployment pipelines.

Project Experience

- **AI-Based Dengue Outbreak Risk Prediction and Monitoring System** - 2026 – Present *(Ongoing Final Year Project)*
  - Developing an AI-powered dengue outbreak prediction and monitoring system for Sri Lanka using the MERN stack and machine learning techniques
  - Building interactive dashboards and responsive web interfaces for real-time dengue risk visualization
  - Integrating environmental and numerical data to predict dengue outbreak risk levels
  - Implementing data analysis and monitoring features to support proactive healthcare decision-making
  - Collaborating with team members using Agile methodology throughout the software development lifecycle
  - Contributing to frontend development, backend integration, database management, and system design

- **CarePoint** – A Safe Digital Space for Mental Health and Expression Team Leader | March 2025 – Present - Led a 5-member team to develop a web-based mental health platform for Sri Lankan youth - Designed and implemented responsive UI using HTML, CSS, and JavaScript - Developed features including journaling (PowerPoint-style editor), mood tracking, and

anonymous chat - Coordinated Agile tasks, managed timelines, and contributed to frontend and backend development

- **Hotel Booking Management System Team Leader** | July 2024 – October 2024 - Led a 4-member team to build a hotel booking system with online reservations and customer profiles - Designed responsive frontend using HTML, CSS, and JavaScript - Implemented backend functionality using PHP and MySQL - Integrated automated booking confirmation features
- **Smart Waste Collection System March 2025** – April 2025 - Built a responsive web interface to improve waste collection efficiency - Integrated real-time data handling using PHP - Contributed to an estimated 65% improvement in operational efficiency
- **Personal Portfolio Website** (React.js) Individual Project | September 2025 - Developed a personal portfolio using React.js and reusable components - Implemented routing and animations using React Router and Framer Motion - Styled with Tailwind CSS for responsive design - Deployed using GitHub Pages
- **Machine Maintenance ERP System (Ongoing**) Individual Project | October 2025 – Present - Developing a web-based ERP system using React, NestJS, and MongoDB - Digitalized machine maintenance records with barcode-based identification - Implemented maintenance workflows, issue escalation, machine history tracking, and role-based access control

---

Education

- Top-Up Degree in Computing and Software Engineering Cardiff Metropolitan University (Final Year – Following)
- Higher Diploma in Computing and Software Engineering Cardiff Metropolitan University
- G.C.E. Advanced Level and Ordinary Level Ave Maria Convent, Sri Lanka

---

Certifications & Courses

- Diploma in Spoken English – British Way English Academy (Distinction)
- Diploma in Information Technology – British Way English Academy
- Effective Prompting for Generative AI – by learn Microsoft
- Diploma in IT – University of Cambridge (2015)
- SQL Queries and Database Design
- Self-Learning: React.js & Frontend Development (FreeCodeCamp, W3Schools, YouTube)
